

My approach:

An anti-credit card

SAVER

The credit card
that **pays you.**

Own what you earn.

NAB Savers card.

Introducing NAB Savers card

There's now a way to bypass the usual fees and interest that come with your credit card. One that is simple, easy to access, and puts money in your pocket like no card before - NAB Savers card.

Using the flow of your income, it lets you generate interest and make purchases with your own money. Watch the money roll into your account each month, accumulate annual bonuses, and earn interest each time you spend or withdraw funds.

How it works

The NAB Savers card has a magnetic strip that is unreadable by any form of banking technology, this is because it is a digital print. Unlike other credit cards, it cannot be used to access your bank account or to generate credit with the bank, which would cost you interest on purchases, transfers, and withdrawals. This protection from unnecessary charges is what makes the NAB Savers card system superior to any other.

Earn more for less.

By choosing the NAB Savers card, you are choosing to gain interest for every cent you don't spend on another credit service. Plus you will be paid your annual fee and all other hidden fees instead of being billed.

Why the Savers card?

Want to buy that car you need?

Furnish your house?

Go on a holiday?

Maybe you just like shopping.

Whatever you need, you can save for it faster and without financial obligation using the advanced fund management system of the Savers card, making the most of the money you earn.

NAB goes green

Using absolutely no paper stock or energy resources for account maintenance, this revolutionary card is also the lowest producer of carbon emissions, and aids the sustainability of the natural environment, and the future of generations to come.

Your rewards.

What you will receive as a Savers card holder (minimum).

\$1,000 Card
