

# BACKGROUND

---

For this project, we did a brainstorm of problems in relation to the word “dialogue”. After doing some research, we have found that miscommunication/misconception as the most common problems with dialogue in our daily life, whether it’s a relationship between friends, boyfriends/girlfriends, family, etc.

Therefore, for this project, we want to focus on the misconception side of a relationship between women and men. There are often words that have been said and misunderstood by women and men as, both genders have different ways of thinking and understanding it. We have decided to create a love dictionary for women and men, as a solution to this problem.
